

To measure the gateway experience for developers, TSG rates GEM gateways based on their API offering. Looking at the illustration, on average, gateways rate best on Certification Process. Gateways that do not require certification to move to production score higher for speed and ease.

Gateways, on average, rate worst within Developer Tools. Low scoring gateways generally lack supplemental tools creating a more difficult environment for developers to test/integrate.

TSG is currently enhancing its API assessment to provide a deep-dive into 50+ 'Best in Breed' API offerings in comparison to GEM subscribers.

Average Gateway API Ratings

Ratings from 1-4 (4 is best)
