

→ Performance of Public Payments Companies

tsg Payments Index vs. STANDARD & POOR'S

TSGPX

S&P 500

Payments companies have been thriving in recent years and are becoming more valuable and profitable for the company and its investors. With strong earnings year after year, many payments companies are rapidly increasing their market capitalization and gaining the attention of additional stakeholders.

The chart displays the performance of a \$100 investment in an index of selected payments companies which represent the “TSG Payments Index” – this index is calculated on a value weighted basis using market capitalization and is compared to the S&P 500 which is also calculated using the same methodology. **A \$100 investment in the TSGPX in Q1 2011 would be valued at approximately \$580 in Q3 2019, as compared to \$225, if invested in the S&P 500.**

On average, payments companies grow at a compounded rate that is **12% higher** than that of the industry average. This growth rate is more than double of the industry average and represents the attractiveness of the payments market. The Payments Index is depicted to portray the growing nature of the payments market and hints at where this market is headed in the coming years.
